Professional Statement

A hard-working and meticulous professional, with about 3 years of experience in web development and more than 10 years of experience in software development and computer system support for many technology stacks and business domains. My enthusiasm and attention to detail have enabled me to provide delivery excellence on several projects to a first-rate standard.

Projects

GitHub Contributions

- [Code Your Future](#) 

- Volunteer Forms
- Dashboard / Manage applicants & volunteers processes
- API to connect ITD, Volunteer form and Dashboard
- Introduction to Digital (ITD) / Student Application Process

Creating functionality for CYF products using React.js, Node.js, and MongoDB.

Implemented server-side pagination and filtering to improve dashboard performance.

Custom hooks were used to encourage best practices in React.

Aggregation pipelines and caching were implemented to reduce resource utilisation.

Implemented tests and Swagger documentation for features in development.

Representative Projects

- [ECommerce Shop](#) 

ECommerce online shop using MERN stack

Technologies: [MongoDB](#), [Express.js](#), [React.js](#), [Node.js](#), [Bootstrap](#), [Git](#), [GitHub](#)

- [Job Application App - Final project for CodeYourFuture](#) 

[Hackney Migrant Centre](#) 

Develop a job application app where job seekers apply and track their applications. There are two separate modules for applicants and HMC employees.
